

Oblique

by Febrian Aditya and Ida Latifa

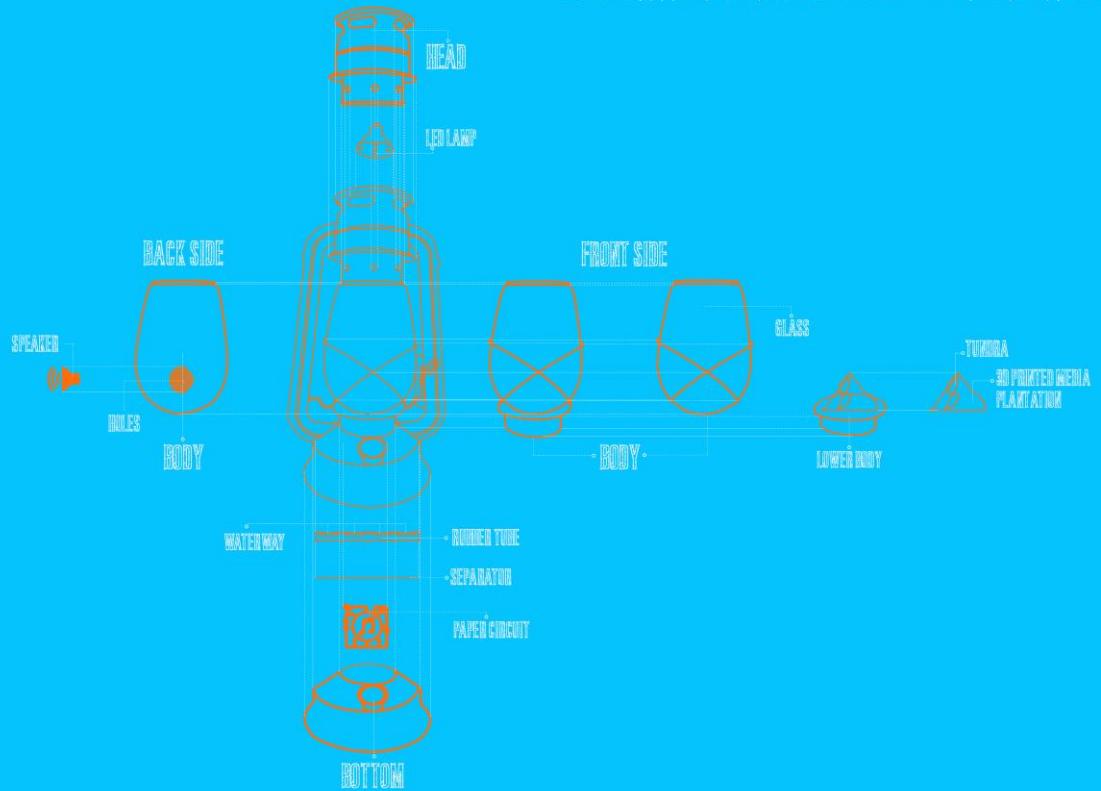

Oblique (ob:lek in Java Language written *oblik*) basically comes from a traditional lamp in Java, Indonesia. The lamp is usually used by community as a lighting tool to move to a new house/living place. Moreover, it is also a symbol of land discovery.

Inside the Oblique, there is Tundra plant as a reflection of sophisticated life. The basic working flow of the Oblique is to generate life in the extreme weather in Antarctica. The Tundra plant represents a simple life which could be preserved and developed, supporting the possibility of making Antarctic area as a sharing space by a simple step. In other way, Tundra itself has an act as biological culture penetration which is close to humanity.

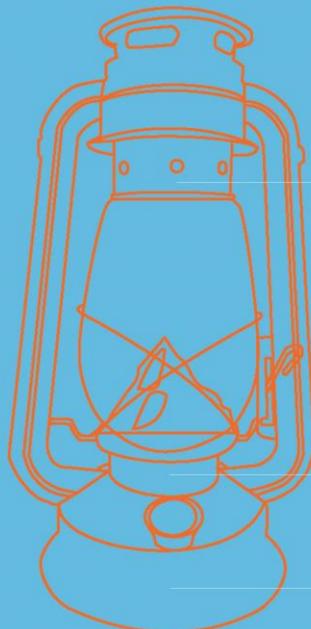

Furthermore, the Oblique also roles as a life support using the technological factor such as sound vibrations in particular frequency, the conditional chamber to conduct the temperature, and artificial lighting to support the growth of the plant (life) when the sunlight is not perfectly available.

SCHEMA OF OBLIQUE

HOW IT WORKS

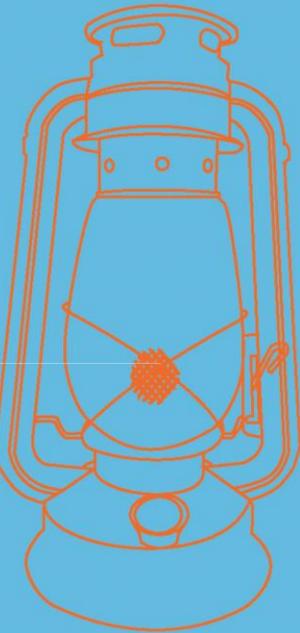

- LED LAMP IRRADIATES THE TUNDRA BELOW

HOLES FOR THE SOUND TRANSMITS ITS FREQUENCY
AND WILL HELP THE TUNDRA TO LIVE BETTER IN
EXTREME WEATHER

- WATER FLOWS FROM BELOW THROUGH RUBBER PIPE
- THEN WILL BE ABSORBED BY THE TUNDRA THROUGH
A SCREEN

- A PAPER CIRCUIT ATTACHED BELOW AS THE MAIN
SOURCE FOR THE SOUND AND THE LAMP

Artists Overview

Ida Latifa

Ida Latifa is born and raised in Surabaya.
